IT Training Aggregation Services

Your One-Stop Service for
End-to-End IT Training
Sourcing & Management

Information technology is at the forefront of navigating businesses through the unpredictability of the pandemic towards an age of digital fluency.

However, in a constantly evolving IT landscape, how do you ensure that your teams have the skills they need to get the job done? While there are multiple choices available, sourcing IT training providers with in-house resources can often be ad hoc, expensive, and time-consuming.

Now, more than ever, business and IT training leaders need a clear line of sight into their global IT training budgets and spend while ensuring that their IT teams have access to best-in-class training that future-proofs and prepares them to stay one step ahead of the next challenge.

As a business and IT leader, do any of these challenges resonate with you?

01

Limited Options to Choose From

Your standard IT training vendor partnerships are holding you back and you can't get the latest, best-in-class options from niche providers. This leaves you with little or no room for better options, negotiations, or economies of scale.

02

Identifying the Right Vendors at Point of Need

Identifying the right vendor for ad hoc or unplanned needs really stretches the bandwidth of high-value in-house resources, adds significant administrative overhead, and leaves you with a pool of disparate IT training vendors.

03

Inconsistency in Quality and Pricing

A disparate pool of IT vendors which is not centrally sourced or managed usually results in inconsistent quality, conflicting delivery styles, and erratic pricing and billing frameworks.

04

No Clear Line of Sight on Future Demand

When most IT training is sourced only at the point of need, it limits the ability to optimize the overall IT training budget and spend through a process of smart demand planning and forecasting.

05

Redundancy and Duplication Across the Enterprise

Without a centralized view of your IT training needs aligned to organizational business goals, your organization could have multiple IT training vendors serving similar needs leading to redundancy and duplication across the enterprise.

N

If you have similar challenges, we've got you covered. Give your businesses the advantage of one-stop sourcing, strategy, execution, and seamless scalability with NIIT's IT Training Aggregation services.

NIIT's comprehensive IT training Aggregation services take the cost and chaos out of sourcing and managing multiple IT training vendors, giving your learners a consistent learning experience and enhanced choices across the enterprise for every skill, every time.

```
mirror_mod = modifier_ob.  
mirror object to mirror  
mirror_mod.mirror_object  
operation == "MIRROR_X":
