

OUR L&D SOLUTIONS

NIIT

Learning Solutions

CUSTOMER EDUCATION

Our portfolio of customer education services helps technology companies elevate customer success and learner experience while improving margins and profitability even as technology continues to transform.

IMMERSIVE LEARNING

At NIIT Nfinity Immersive Studios, we provide a full suite of immersive learning solutions that not only transform learning but also deliver measurable business impact. Our mission-based training scenarios are designed to develop employee expertise in key skills through hands-on practice in hyper-real immersive environments and challenging, game-like situations, combined with expert coaching and feedback.

PROFESSIONAL AND BUSINESS SKILLS

With NIIT's managed services approach to leadership and professional skills development, your teams have the advantage of a comprehensive approach that covers the entire lifecycle of training from content licensing and procurement to facilitation, delivery, and administration at reduced costs and increased impact.

DIGITAL AND IT SKILLS

At NIIT Digit, our focus on program mastery rapidly upskills your workforce with not just technical skills by building competencies at multiple levels specific to their role but also holistic skills like problem-solving and business understanding for competitive advantage.

Talent Solutions

HCM TECH AND CONSULTING

At NIIT, we have had decades of experience working with different technologies like Cornerstone, Degreed, SumTotal, SABA, Workday, Docebo, EdCast, and SuccessFactors. Our platform-agnostic HCM technology experts give you the advantage of decades of experience and expertise in product implementation, integration, administration, and functional consultancy.

DIVERSITY, EQUITY, AND INCLUSION

We understand that the tick-the-box approach that has garnered popularity doesn't realistically challenge or educate learners on the nuances of DEI issues and conversations. That's why our diversity and inclusion training solutions are built to create lasting change.

TALENT PIPELINE AS A SERVICE

Not only has it become prohibitively expensive and time consuming to find the right talent, but there's also no guarantee that the person you hired is right for the job until they get started. NIIT's Talent Pipeline as a Service (TPaaS) has been designed to solve these very challenges. With a Source-Train-Hire approach that gives you access to reliable talent that is ready to be productive from Day One, we help you build robust and cost-efficient talent pipelines to meet current and future needs.
